Moderna had a party for themselves to praise themselves all glorified and powerful, and to tell the world how most excellent they think they are. They made a 106 slide [powerpoint presentation](#). On pages 6 and 7 of this presentation, they list all the crap they have in store for the humans - either ongoing - or to be announced in the near future.

It shocks me that they have integrated this mRNA tech - that has yet to be proven safe for use in humans - into an HIV product. The reason after 30 years of trying that we do not have a vaccine against HIV is because, it's pretty much an unachievable goal due to the nature of this virus.

This is another farce, in my opinion. It's only in Phase 1 trials, but pay close attention people. This will not go well and they will sell it as though it has gone well. Guaranteed. These are not people who care about human well-being; these are corporate entities that exist to profit. Period. This also has Fauci's name all over it, by the way.

Every fucking time that a doctor will give me a medicine, my first question will be: "is this mRNA?"

At the root of this is the EUA. It is absolutely ridiculous that drug manufacturers can still be creating anything that shields them from liability under the pretense of an emergency. The Emergency Use Authorization is a farce that has gone long enough.

This is one of the emails I received the other day. I get hundreds daily, and I am hearing you all.

This particular note spoke loudly to me and this lovely person gave me permission to share her words.

Rewrite: Let's tag team this until everybody understands

The modified spike protein is dangerous and for very specific reasons.
